/* The spacing and padding on the summary is tricky; we want to keep
 * the icons from touching each other or the edges of the screen, but
 * we also want them to be "Fitts"-y with respect to the edges, so the
 * summary area's bottom and right padding must actually be part of
 * the icons. However, we can't put *all* of the padding into the
 * icons, because then the summary would be 0x0 when there were no
 * icons in it, and so you wouldn't be able to hover over it to
 * activate it.
 *
 * Also, the spacing between a summary-source's icon and title is
```

```css
 * actually specified as padding-left in source-title, because we
 * want the spacing to collapse along with the title.
